

The 2014 Update serves as a technical refinement to the DC Transit Future System Plan (2010 Update)

It is intended to achieve the following:

- Incorporate recent planning, transportation, and development initiatives
- Provide an operating strategy and implementation plan to support the vision
- Identify expansion areas based on recent developments in or adjacent to the District
- Develop an action plan and funding strategies for full system implementation

The following themes emerged describing the project's needs:

- Increase transit capacity
- Provide enhanced access and mobility
- Accommodate population and employment growth
- Support continued community vitality and economic development
- Support environmental/public health
